

INFORMATION SHEET N°	39	TARGET	11.b
-----------------------------	----	---------------	------

OUTPUT

Indicator	Design volume (m3) of the installed Sustainable Urban Drainage Systems (SUDS).
------------------	--

Description	Annual drainage capacity of the SUDS installed in Madrid Nuevo Norte
--------------------	--

Type	Quantitative	Source	VLR Madrid
-------------	--------------	---------------	------------

Data source

Madrid Nuevo Norte	Drainage capacity of the SUDS	BIM	NO
---------------------------	-------------------------------	------------	----

- Sustainable Drainage Master Framework of Crea Madrid Nuevo Norte

Comparison	Drainage capacity installed in the city of Madrid
-------------------	---

- Strategy for localising the Sustainable Development Goals of the 2030 Agenda for the City of Madrid

Calculation method

Comparison between the capacity of Madrid's existing drainage systems and the planned capacity of Madrid Nuevo Norte. Percentage contribution of the m3 of capacity of DCN with respect to the remaining m3 to achieve the goal for Madrid 2030.

OUTCOME

Indicator	Unit	Source
-----------	------	--------

Consumption of materials per capita	t/inhab.	SDG indicators (Spanish Statistical Office) (https://www.ine.es/dyngs/ODS/es/indicador.htm?id=5108)
-------------------------------------	----------	--
